Summary

Product Management Intern at Khalti, a leading digital wallet company, driving features from business requirements to launch across payments, cards, and in-app experience. Collaborate closely with engineering and use AI to turn early ideas into working prototypes, enabling stakeholders to review a tangible solution before the PRD is finalised. Independently built and launched MyMoodly, a live consumer web product.

Education

Kalinga Institute of Industrial Technology (KIIT University)

2023 – 2027

B.Tech, Computer Science and Engineering (4th Year)

Bhubaneswar, India

- Relevant Coursework: Software Engineering, Software Project Management, DBMS, Operating Systems, AI, ML

Professional Experience

Khalti by IME

Apr 2026 – Present

Product Management Intern

Kathmandu, Nepal

- Owned end-to-end PRD lifecycle for Khalti's wallet-first card suite (Physical Wallet Debit Card, Virtual Debit Card, Virtual Credit Card), from business requirements and risk controls to cross-functional sign-off; Virtual Debit Card now serves 300,000+ active users. Authored 30+ PRDs in 3 months across regulatory, business, and user requirements
- Established a prototype-first discovery process across Khalti Mall, Tourist Wallet and Migrant Mode: converted BRDs into clickable prototypes built with Claude Code and reviewed them with senior stakeholders before PRD sign-off, surfacing edge cases and proposing solutions (Tourist Wallet alone: 21 screens, 16 edge cases)
- Validated REST API contracts in Postman ahead of engineering handoff as standard practice, resolving integration and response-shape defects upstream to prevent mid-sprint blockers, and automated regression coverage across releases using Appium
- Contributed to two production AI features: defined risk policy for FacePass biometric auto-KYC, authoring the liveness and spoof-detection thresholds that gate onboarding; and managed the RAG knowledge base behind Khalti's AI chatbot so users receive only verified information
- Spearheaded a search UX enhancement surfacing trending and recently used services, increasing search-section CTR by 20% and reducing user click depth

Projects

MyMoodly: Live Anonymous Mood-Matching Platform

Solo Product | mymoodly.space

- Conceived and launched a live anonymous peer-support platform as a solo builder, using Claude Code and reviewing and correcting generated code before release. Designed a matching engine that pairs users based on their current mood for time-boxed chats, with a built-in crisis escalation path (TypeScript, React, Next.js, Cloudflare Workers)

CashKaro: Product Strategy Assignment

APM Intern Case Study

- Found a context-loss bug in CashKaro's purchase flow through live-app testing and proposed Predictive Payment Intelligence: preference- and history-driven nudges, capped weekly, with a power-user pilot measured on incremental tracked orders against a randomised control

Achievements and Leadership

KFUPM Intelligent Planet Hackathon

2026

- Placed in the Top 50 of 1,000+ global teams; led product development of Soulace, an AI-powered emotional support platform, driving product strategy, feature prioritisation, and the final pitch narrative; earned one month of mentorship with Google experts

GSS Social Club, Event Organiser

- Led Fabulous February, a large-scale cultural event featuring film and music artists; secured 5 sponsors, raised NPR 250,000+, sold out 500+ tickets, generated NPR 85,000+ profit

Skills

- **AI and Building:** Claude, Claude Code, AI prototyping, RAG, Prompt Engineering
- **Engineering:** Python, SQL, REST APIs, GitHub, Postman, Appium, Cloudflare Workers
- **Product:** PRDs, Prioritisation, API contract scoping, User Research, Competitor Analysis, Roadmapping, Stakeholder Management
- **Tools and Analytics:** Jira, Notion, Figma, Mixpanel, Power BI, Microsoft Excel, CleverTap

Certifications

Product Management: An Introduction, IBM (Coursera)

Mar 2026

Agile Project Management, Google (Coursera)
